

CLIMATECARE®

Contractors that "CARE" about customers

In today's fast-paced world where time equals money, it can sometimes be a rare thing to find a heating and cooling professional that really cares about customers.

When you choose to work with a member of the ClimateCare Cooperative, you can rest assured you're working with a leader in your community and the heating and cooling industry. You're trusting a well-established, well-run company dedicated to delivering above-average **CARE – Comfort, Accountability, Reliability & Excellence** – to our customers and the communities we service.

ClimateCare members share resources and best practices to ensure superior customer service, technical excellence, and on-going training on current issues. And we train our employees to deliver 'random acts of caring' by going above and beyond the call of duty.

This commitment to excellence is evident in the heating and cooling products that bear our name. Our furnaces and air conditioners are manufactured and tested according to the highest engineering and quality standards in the industry, and come with the warranties to prove we stand behind what we sell.

We'll be there for the installation of your new appliance, and long afterwards to guarantee our products and servicing.

Take comfort with your ClimateCare product. We'll take care with you.

The Heating and Cooling Professionals who CARE.
Comfort. Accountability. Reliability. Excellence.

Winter Comfort

Top Quality Gas Furnaces

95.5% TO 98% Efficient!

Long life! Corrosion-resistant steel construction cabinet with durable tubular steel heat exchanger, protects your investment.

Flexible location! Compact multi-position models install in a variety of spaces to suit your needs.

Reliable! Patented heat exchanger and computerized controls ensure safe and dependable operation.

A/C ready! Models easily work with existing or new central air conditioning units.

Energy-saving! Energy Star rated. Clean-burning system and sophisticated technology puts your fuel right to work.

Direct Vent option! Suitable for single or dual vent application.

Quiet! You'll barely notice the variable-speed blower motor.

Comfort intuition! Two-stage and modulating heating systems run most of the time in the low-heat capacity, but when the weather is very cold, they ramp up to high-heat capacity so your family stays warm and snug.

Adjusts to meet your needs! The variable-speed ECM and X-13 circulating blowers reduce operating costs and improve home comfort by reducing hot and cold swings and temperature differences from floor to ceiling.

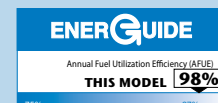

Smart! Integrated furnace control with diagnostics constantly monitors unit operation.

Modulating Furnace!

The modulating gas furnace maintains your ideal temperature by modulating in one-percent increments. You'll feel a difference with our precision temperature control feature, and benefit from better energy efficiency and quieter operation.

UP TO 98% Efficient!

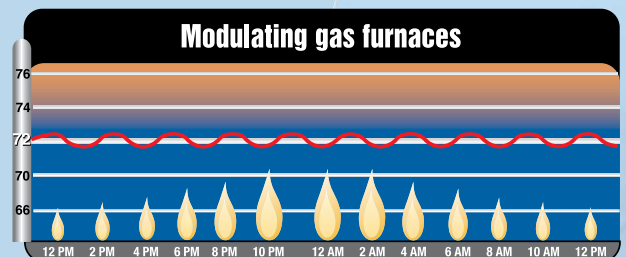

PERFORMANCE AND SPECIFICATIONS

Up to 98% Efficiency

- Many models to choose from
- Compact units stand just 33" tall

* Product purchase must be registered online within 90 days.

Summer Comfort

High Performance
Central Air Conditioning & Heat Pumps

UP TO 18 SEER & 10.0 HSPF

Years of reliable performance! High efficiency compressors and solid core filter dryers significantly add to the efficiency and durability of your unit.

Energy Star! Our high-efficiency units meet and exceed the highest energy efficiency standards, and keep your costs down.

Enduring efficiency! Manufactured with an energy-efficient compressor which operates in tandem with a high-efficiency coil. Together these items cool your home efficiently while saving you money!

Strong, silent types! With a high density compressor sound blanket on high-efficiency models, unique sound control top design, and top grade motor, our units are ultra-quiet. With sound levels as low as 65 dB.

Fit almost anywhere! With cabinet sizes as small as 23½" x 23½" we can provide a unit to fit all your landscaping needs.

Weather resistant! Heavy-gauge pre-painted steel or automotive-grade powder painted finish on premium products resist the effects of weather and time. High grade wire coil guard or louvered coil guards are further protected with a black polymer mesh.

PERFORMANCE AND SPECIFICATIONS

13, 14 + 18 SEER Efficiency

- Many sizes to choose from in each efficiency
- New smart coil is 15% smaller
- All models use R-410A Refrigerant
